GOPAL AGRAWAL,
Chairman --Correspondent.

It gives me immense satisfaction to see the matter for the first issue of School Magazine -- Param Jyoti aptly named after our patron saint and gurudeva Paramahansa Yogananda.

With a humble beginning of the School in June 2001, the bringing out of a substantial House Magazine by combined effort of staff and students comes as a land mark in the spontaneous development of the Vidyalaya.

The expression -- to put in word, speech or print ones creative feeling is the most sublime aspect of holistic development of young students. Let this flame of yearning ever keep burning. The Divine is there to help you in all your noble pursuits. Congratulations to all the contributors.

(GOPAL AGRAWAL)

EDITORIAL

This magazine is a humble beginning. It gives an opportunity to our students, staff and others to express what we think and feel about the happenings within school and around us in the day to day world.

Literature can be understood as the reflection of the contemporary condition of the society. It is like a sword used to barbarious superstitions and evils of the existing society. Pen is mightier than the sword. It touches the heart. It has to be used, to mobilise the latent energy of the dormant soul.

Therefore our primary duty today is to promote national integration which is needed for the well - being and development of the country. Our nation is now scared by various wounds. By misuse of caste, creed, religion, language and religion for personal and political power.

Students are the most powerful source of energy to any nation. The nation's strength and future is purely dependent on the youngsters, who are the future citizens. There is reason for concern, things are not as they could have been. The parents and teacher's are the first leaders. We need to wakeup and lead by example :
Punctuality.....Discipline.....Professionalism.....
Commmitment..... The students shall then not be found wanting.

“Try and Try Again, Success will be yours”

Chief Editor,
Principal

PARAMAHANSA YOGANANDA VIDYALAYA ANNUAL REPORT - EXCERPTS

Our honourable chief guest Prof. G. Lakshminarayana, Vice Chancellor, Dravidan University, Sri. B. Govinda Raj, Educationist and Retd General Manager India Pistons Ltd., Chennai. beloved Chairman and Correspondent of Paramahansa Yogananda Vidyalaya Sri. Gopalji Agrawal. Invited guests, parents and guardians of our students, old students of our school members of staff, and my dear students.

It gives me great pleasure to be with you all in our campus on the occasion of our VII annual day function.

It is my proud privilege to present 7th Annual Report of our school for the year 2007 - 2008.

Paramahansa Yogananda Vidyalaya was started on 11th June 2001 with classes from I to VI and the student strength was 55 which has grown up to the present level of 290. (We keep developing academic block, Hostel block, Residential Block and Playground.) And we run classes from L.K.G. to X Class. This year the school reopens on June 1, 2007.

Academics

There are now 12 sections in all and the teacher pupil ratio is 1:15. The teachers are the heart of an educational institution that pump in energy and utalise life into the school.

The academic program is well planned weekly, monthly and annually home assignments and projects are given to inculcate a spirt of self learning in children. The theory of continues evaluation for the purpose of proper avademic excellence is put into practice.

The 100% results-of the public examinations AISSE 2007 is a reflection of our academic standards. The school maintained its sustained growth both in quantity and quality.

Number of students appeared : -15.
Number of students secured distinction : - 06
Number of students secured 1 class : - 03
Number of students secured II class : - 06
Highest mark secured : - 431 / 500 — 86%.

The students are given opportunities and are encouraged to participate in multifacious activities that are organized in the school

The students are divided into 4 houses and each home is put in the charge of different Teachers. Inter house competitions are held regularly and points, ceitificates and prizes given to winners, I congratulate the students on their fine sense of cooperation and competitive spirit.

Hostel Facilities

Utmost care is taken in cooking and serving well balanced nutrition's vegetarian food. All the resident teachers dine with the students and personally look into eating habit of the each student. There has been all round development in the health of all inmates

The resident teachers who stay on the campus have been giving individual attention to all inmates to develop them physically, mentally, and moraily. There are 54 children in the hostel at present. Most of the requirement of milk is met by our school dairy. We get fresh vegetables from school farm itself. Apart from hostel inmates our N.S.S. volunteers are also being involved in maintaining our garden.

TEACHERS'S ORIENTATION PROGRAMME :-

Only burning light can light another lamp so teachers orientation programmes are arranged for latest teaching methodology to equip the teachers for better teacher pupil interaction and give their best to the children. Prof. Keshev Sharmaji and Sri. Govindaraj are eminent educationists with vast experience guiding several schools, visited our school and guided us in honing our skills in different teaching methodologies.

A well experienced and talented .maths teacher Smt Rajeshwari visited our school to guide our maths teachers.

CELEBRATIONS AND CULTURAL PROGRAMMES

1. On the 15th August, the 61st Independence Day was celebrated and patriotic songs were sung. The chief guest Dr. Krishna Rao Principal, P.E.S. Medical colege, Kuppam hoisted the National Flag and inspected the march past.

4. The school, cultural day was held on 9th October and was inaugurated by Sri. Jayarama Reddy, Chairman RESCO and P.T.A. members Mr. Dhasksha Prakash and Mrs. Ambika Suresh. Competitions in various cultural programs &.. extracurricular actives like Dance, Drama, Elocution, Music etc. for juniors and seniors were held, More than 100 students participated in the competition.
5. Guru Poomima was celebrated on Sep 2007 on January 5 2008 birthday of Sri Sri. Paramahansa Yogananda, annadhan was arranged to children of different schools and from nearby villages. Was arranged on both occasions. About 250 children from another village were invited,
6. Children's day was celebrated on November 14, 2007 Teachers entertained the children by presenting many interesting programs.
7. We regularly conduct co-curricular activities. Starting from June the following competitions were held till the end of January 7-008. Hand writing competitions, Rangoli, Singing, Elocution, Dance, Memory test. Maths quiz, Science and Social quiz, essay writing competition on AIDS Day (December. 1st) etc. all these in both junior and senior levels Prizes were distributed to winners.

8. 55 students participated in science talent exam which was held on 27th January Sunday. The School topper was Rudranuj Bundela of Class VI. Participations certificates were distributed to the Children by unified council.
9. Our school students participated in cultural program organized by Kalatharangani institution. Bireddy Palli, in V.Kota all our nine students won prizes.
10. Every month on full moon moon light dinner is arranged in the hostel when hostel inmates entertained.
11. On 5th February Mr. Ramamoorthy (S.I. Special Branch Crime, Plamaner) was kind enough to visit our school and give a motivated lecture our students and teachers.

SPORTS AND GAMES REPORT

1. Sports day was celebrated on 27th November and the chief guest was Sri. Nanjundappa Circle Inspector of Police, Kuppam
2. Inter house competitions were held and prizes certificates were given to the winners. P.T.A. members attended the program on this occasion.
3. Foot Ball Tournament
Inter school cluster meet was held on 16th to 19th October 2007 in B.G.S, International Residential School, Bangalore, Our student's participated received the parti.Ciptiti.aia and Merit Certificates.
4. Volley ball tournament was organized by sahodaya school complex, Bangalore in November 2007, Our Volley ball team participated and Medals, Certificates and Runners cup,
5. Our school organized Cricket cup 2008 tournament on 30th December to 1st January. 18 teams participated from various places. Match was won by P.Y.V, students teams and they lifted the P.Y.V. Cricket cup 2008.

I am happy to state that we are able to pay individual attention to children the gifted, the average and weak. The success story of P.Y.V. is no secret, its success in skills endeavors can be attributed to the untiring efforts of our staff and the sincere co-operation of our students and parents. Our staff is well qualified and competent. They are committed to their profession, and the cause of education. In an atmosphere of friendliness and hardwork even the weaker children are helped to improve themselves.

We give equal weight for cultural literary, sports and games as well as studies, The aim being the holistic development of children by blending noble qualities with the scholastic achievements. So as to make every student of P.Y.V. gentlemen, a citizen, who can always compete in the competitive world. This objective is impossible without a team of dedicated staff and I am proud of the staff who leave no stone unturned in this endeavour.

Thankyou all for your gracious presence and wish you memorable evening.

Jai Hind

Principal

EQUAL RIGHTS FOR MEN AND WOMEN

She cooked the breakfast first of all

Washed the cups and plates

Dressed the children and made sure

Stockings all were made.

Dusted chairs and made stairs,

I roamed an hour or two

Baked a jar of cake and pie,

Then worked to cook and stew.

The telephone rang constantly

The door bell did the same

The younger bell and hurt his toe,

And then the laundry came.

And when her husband came at six

He said," I envy you!

It must be nice to sit at home

without* thing to do

COMMUNICATION HELPS IN DEVELOPING CONFIDENCE

Today, the need for honing one's communication skills has assumed as much significance as is possessing knowledge in various fields. To succeed in the competitive world, we must learn how to communicate well. this is an art that must be learnt by all.

Our School realized the importance of this and teaches the students such "soft skills in the class.

Apart from regular academics, the school is providing various opportunities to participate in sports, games and cultural activities to bring out their bidden talents and for hte all around development of the child.

The students are encouraged to participate actively in daily assembly. programes by giving various concepts and in C.C.A. programs various Quiz concepts, Talents test, and many more co-curricular activities were organized to create courage among kids.

These programs ultimately result in improving. Their communicative skills and there by develops confidence to face audience to speak.

All this becomes possible only because of efficiency and encouragements of the management. principal and staff of the Paramahansa Yogananda Vidyalaya,

- Mrs. Saritha (Maths Dept)

ENGLISH POETRY

Clouds are dancing
The birds are singing
Oh ! What a wonderful world.
Flowers are blooming
The rain is pouring
Oh ! What a beautiful world
Sun is shining
The trees are swaying
Oh ! What a colorful world

- By Rudrarish Bundela VII Std.

- * The highest service of mankind is not to do evil to anyone or think anyone as evil.
- * None has any right to think anyone as evil even if he seems to do some wrong
- * If one determines not to repeat a wrong, he is every faultless.
- * Till you own anything as yours, you cannot do any real service
- * The world runs after the real server not after the world.
- * As a flower automatically diffuses fragrance service comes out of a real server
- * Sensual enjoyment results in subordination, inertness and powerlessness
- * If we really have faith in God then any unfavourable circumstances should joy in our hearts

TIPS FOR HAPPINESS

- * Live a simple life is moderate in your habits
- * Avoid self seeking and selfishness makes simplicity the key notes of your daily plans
- * Spend less than you earn. This may be difficult but it pays big dividends. Keep out of debts. Cultivate saving habit, avoid wasting money.
- * Think constructively. Train yourself to think clearly and accurately. Store your mind with useful thoughts. Learn to control your mind.
- * Resist the common tendency to want things your own way. Try to see the other person's point of view.
- * Be grateful begin the day with gratitude for your opportunities and blessings. Be glad for the privilege of life and work. Rule your moods. Cultivate a mental attitude of peace and good will
- * Give generously. There is no greater joy in life than to render happiness to others.
- * Be interested in others, direct your former self-centeredness. In the degree that you give, serve, and you will experience by product of happiness.
- * Have a hobby. Cultivate a hobby to which you can turn for diversion and relaxation.
- * Keep close with God. True and enduring happiness depends on close alliance with Him. It is your privilege to share His thoughts for your spiritual nourishment, and to have a constant assurance of divine protection and guidance.

BOTH SCIENCE AND RELIGION ARE INTERDEPENDENT

- * Religion without science is superstitious and science in the name of scientific development we are digging religion is for our life, but science can increase only our "standard of living"
- * The sad paradox of scientific development. Is that scientific superstition has started replacing religion's superstition
- * Religion begins where science ends and both are dependent on each other.

STORY

- * Proud candle and humble Incense
- * In a room, in a corner, an incense stick was burning and on the other corner a candle was lit. The candle said to the incense stick in a voice of superiority, I am fortunate and beautiful. My light spreads near and beautiful
- * The incense stick replied, that is well, but if you can remain steady in times of trouble, that alone is the fruitfulness of your glow.
- * The candle being proud paid no attention to this advice. A strong breeze came. The candle was put out, but the incense stick with an even greater vigor continued to spread its sweet smell.

CHARACTER BUILDING

The growth of a child is like a growth of a plant. Just like a plant grows naturally so also a child grows. As we take care of plant by protecting it and by giving it proper nature and water. The child needs timely guidance from parents and teachers to build up its character and personality and grow.

As we all know that character power to the greatest power in the hands of a person, it is to be strengthened at any cost, if at the cost, the child develops a sound and noble character and grows, that means accumulation of good thoughts and action patterns whatever he may do however challenging may be his circumstances and wherever he may live, he has a strong arm to fight against all odds and live meaningfully and successfully, without character on the other hand however talented and intelligent one may be one's education/ life remains incomplete and ineffective.

Therefore character building is the best when started young it means during the student days. The students should be administered five vows and start character building. These vows have to be diligently cultivated and practiced.

The First Vow:

Vow for Physical well-being : excellence in life words of Greek Philosopher "A Sound mind in a sound body" is well known hence a student should regularly do physical exercises to his body and mind healthy and fit. Control of senses is required for the development of intellect and moral values as well, he should never fall victim to addictions like smoking, drinking, use of drugs etc. "Nerves of steel and muscles of iron" is necessary according to Swami Vivekananda, he says play football and make body and mind strong enough to study and understand Bhagavad-Gita. "

The Second Vow:

Vow for Regular and sincere study : systematically is systematically student. He should never neglect or postpone studies, assignments and reading textbooks and other good books. There is no substitute for reading good books. He should learn the right method from his teachers. Mere passing of examinations and scoring very good marks are not quite enough. Acquisition of knowledge will expand his mental horizon. Bertrand Russell in his 'Unsettled

men increase in wisdom as much as in knowledge , he gets nothing but sorrow
* In brief , The second Vow is the pursuit of knowledge and exigence.

The Third Vow :

Vow of truthfulness in words actions: Truth alone wins and not untruths healthy. One must develop the habit of speaking truth. One should always speak truth but not hurt others. Practice truthfulness in We, absolute truth is god.

The fourth Vow :

Vow for unselfishness and compassion one who considers other Well- Being as his own good is the great among good people. Swami Vivekanand says they only Now who live for others and rest and more dead than alive: Therefor students should develop broad mind ness, humility respect for others , love forth country .The Chinese Philosopher Confudus said . * Do unto others what you want others to do unto you this the underlying principle of being unselfish or truthful.

According to Swami Vivekananda that which is selfish Is immoral and what which is unselfish is moral. To practice unselfishness one must be courteous patient with each and every one unselfishness mates a man service minded.

The Fifth Vow :

Vow for Brightened citizenship. Everyone owes something to society. Well- managed righdy focused and unified collective power Is the only way for social well - being.

An enlightened citizen Is a citizen with enlightened sense of doing good needs to others.

He to a responsible member of the society and is willing to contribute to others well being. He not only exercises his rights but also performs his fundamental duties. The fifth vow alms at Inculcating social amity and rasponetfaMty here It is worthy remembering Jhon F.Kennedy's words "Ask not what the country has done to you. Ask what you have done to the country. Swami Vivekananda has said "We must have We building man-making, character making assimilation of ideas "If one assimilates these ideas and makes them the goal of ones Nfe and character, one has more education than any man who has got by heart a who library.

- V. Surendra Reddy, MA M.ED. P.GDIT

ABANBONED FARMHOUSE

He was a big man, the size of his shoes
On a pile of broken dishes by the house
A tall man too, says the length of his bed
In an upstalis room, and a good
God-fearing man
Says the bible with a broken back
On the floor below a window
Bright with sun
But not a man for farming, says the fields
Cluttered with boulders and a leaky bam

POLLUTION AND HEALTH

Most people are now well aware that environmental pollution is definitely detrimental to human health directly, as well as indirectly owing to its adverse effects on animal, marine and vegetable life.

However, the most significant pollution, which is the seed of all types pottution is mental pollution. Every verbal directive and physical action to essentially preceded by thoughts originating in the mind. A polluted mind conceives polluted thoughts, which are then translated into polluted and contaminated words and actions.

The human mind is the one of the from which the conception of all types of pollution initially originates, motivated by negative influences of the led to an unprecedented rise in the global population. To sustain such a progressively multiplying population, more and more commodities ara required, besides sssntiil commoolties to atoo on the increase, that too merely to satisfy requirements of luxury of the populace.

These call for more and more industries which In turn increasingly contribute to the pollution of the atmosphere, to the ultimate detriment of humanity at large .

The mental pollution give rise to diseases Hke acute mental tension, worry, anxiety and phobia.

Hence it is essential to safeguard ourselves from both environment as well as mental pollution.

Environmental pollution creates only physical health problems, whereas mental pollution is harmful to physical, mental, social and spiritual health of the individual, ultimately leading to the degeneration of society.

The only way to solve the problems created by mental pollution is by spiritual awakening.

THE ENVIRONMENT: WHAT A STUDENT SHOULD KNOW.

Back ground

Human population and development has grown at a rate in the last 100 years. This growth has resulted in enormous pressures on food, forests and other natural resources. The effects of development has had an adverse impact on our surroundings. Unplanned and haphazard development particularly doing the greatest damage. Clean air, water and surroundings are at premium now. Therefore wise use of our natural resources has become vital.

Importance

If you live in a city you may have noticed the pollution in air as you go to school. This pollution is especially high in places like Delhi, Calcutta and Mumbai where the traffic is very dense. This is only one of many kinds of pollution problems that are up to the whole of the planet of ours the students of today will be inheriting this planet tomorrow. Therefore it is important for you to have an idea of the environment and immediate dangers confronting it and know a few things about our environment.

All species of plants and animals live on this planet in a delicate biological and physical balance called biosphere. Our planet has itself comfortably for millions of years for in present conditions any living organism requires certain factors to be essential that the natural habitat is not encroached upon and may take few years to destroy. Nature may take 1000 of years to rectify it is our responsibility to conserve the planet as we are the main culprits. The union environment minister Suresh Prabhu indicated in April 1998 that environment will become a compulsory subject in school and college education soon, probably in 1999-2000.

June 5th is observed as world environment day.

CREATIVE THINKING.

Necessity is the mother of invention - PLATO All of us have been through a clear education system that aims at enhancing our knowledge skills and abilities and one important that very essential in today competitive world is creativity.

A simple definition of creativity can be that It Is the ability to Imagine or Invent something new. This does not mean that we need to create something out of nothing but we should be able to generate new ideas.

Everyone of has adequate creative ability. Our creativity often gets suppressed in school, college or in lifebut its still there and can be reawakened. Do you know, what Is required to be creative? Just a commitment to creativity and to take the time for It. Right from Thomas Alva Edson, wright - brother's and all the other great inventor to the modem day technologist, all of them have contributed a lot to the mankind by coming out with creative Ideas to make our lives lawyer one can say all the creators may be Intelligents may not be creators.

HONESTY

Honesty means fairness justice truth and sincerity. An honest person is upright in speech thought and deed. He never thinks untruly insincerely. His thinking is always' true.

Earnest and without any sort of deceitful behavior. Again he always speaks what is true even if it is bitter. He would never lie or cheat for the sake of any selfish end. Finally an honest person would never do anything evil or unfair. His actions are fair just and impartial. Honesty is a divine quality indeed.

Honesty is the greatest strength of a person in this world. Many a story can be related to confirm the value of honesty, it has been rightly said that honesty is the best policy.

ORIGIN OF LANGUAGE

Language is a system of spoken written symbols by which human beings communicate. It is universal among primitive and educated people alike. Today large number of languages exist. Little is known of where and how language originated. But is agreed that It probably' began when certain sounds were accepted as standing for objects. These sounds became known as' WORDS". Later, words were developed for more complicated things or ideas and ways of putting words together to form sentences developed gradually.

The process must have happened in separate human communities with many languages originating and dying out. Slowly particular word systems managed *to* spread. And came into common use by many people and there by got established permanently. Writing came long after speaking it is reckoned that the entire history of written Language does not stretch, more than 6,500 years. It is just a tiny fraction of time people have been speaking. Every baby learns a language from its parents and other older people. We call this the mother tongue/People, when they shift or migrate, may even learn a new language. It is because for many human activities forms of behaviour and ideas are closely tied to the words or written symbols we use for them. Scholars Divide the thousands of known languages Into families which show close relationships. The rules for using a language are called its grammar and the scientific study of Languages is linguistics

APPLE TONES UP THE BRAIN

Apple is the best fruit to tone up a weak and sun - down physique. It tones up the brain and the body due to the presence of phosphorous and iron elements in it. It stimulates the liver, removes its sluggishness and imparts vital energy to the brain and the body.
